INTERNATIONAL ELECTROTECHNICAL COMMISSION

SUBCOMMITTEE 86C: FIBRE OPTIC SYSTEMS AND ACTIVE DEVICES

To: P-members of IEC SC86C

SUBJECT: Request for early comments on 86C/1629/CDV

BACKGROUND

The following document from SC86C is currently being circulated to the National Committees for review.

Document Number	Description	Deadline for Comments
86C/1629/CDV	CDV for IEC 61290-1-1 Ed. 4	2020-03-13

SC86C WG3 would like to discuss the votes and comments from the NCs at its upcoming meeting in San Diego, CA, to be held on 13 March 2020.

Since the date of this meeting is the closing day of the above referenced circulation, the final list of comments from the National Committees will not be available in the time of the meeting. Therefore, WG3 would benefit from receiving comments early, preferably before 10 March 2020.

REQUEST

The National Committees are encouraged to send in their votes and comments by 10 March 2020, if possible, so that they can be discussed at the working group meeting in San Diego.

Of course, all comments received after 10 March will be addressed after the working group meeting.

We thank the National Committees for their kind consideration.

Best regards,

Fred Heismann

Secretary, IEC SC86C
